

COMPANY PROFILE

**BUILT ON QUALITY.
DRIVEN BY ENGINEERING.**

GHANA / WEST AFRICA

WHO WE ARE

Beta Prime Construction & Engineering is a Ghana-based construction, engineering and project management company. Founded in 2026 by professionals with more than 20 years of combined experience, we take projects from early planning to final handover.

20+

Years of combined team experience

3

Regions of team experience

6

Integrated service lines

ENGINEERING-LED. CLIENT-FOCUSED.

We work as both contractor and engineering and project-management partner: one accountable team from early planning to final completion.

Our primary focus

- Civil works
- Residential construction
- Commercial construction

OUR STORY

INTERNATIONAL EXPERIENCE. LOCAL UNDERSTANDING.

Beta Prime was formed by professionals whose careers span Ghana, the Middle East and South Asia.

That mix of cultures, technical backgrounds and construction experience is our advantage. We combine international practice with local knowledge to develop solutions suited to the Ghanaian market.

We founded Beta Prime to deliver more than construction: stronger engineering input, better coordination, clear communication and greater value. Every client should feel informed, supported and confident from the first meeting to the final handover.

VISION, MISSION & VALUES

Long-term relationships, professional delivery and added value guide everything we do.

Our Vision

To build lasting relationships founded on trust, and to deliver genuine added value through construction and engineering services across West Africa.

Our Mission

To deliver reliable solutions through quality workmanship, professional management and clear communication, supporting every client from concept to completion.

Integrity

We act with honesty, accountability and professional responsibility.

Quality

We plan properly, supervise closely and give every detail the attention it deserves.

Transparency

We give clients clear information so they can make informed decisions.

Engineering Excellence

We bring practical engineering knowledge to every technical problem.

Client Partnership

We work alongside each client as a long-term project partner.

OUR SERVICES

Integrated construction and engineering services for private residential, commercial and civil projects.

Civil & Structural Works

Foundations, concrete and structural systems, blockwork, drainage, external works and general civil construction.

Residential Construction

Private houses, villas and residential developments, delivered with careful coordination, quality workmanship and refined finishing.

Commercial Construction

Offices, retail spaces, small commercial buildings and business facilities.

Architectural, Structural & MEP Design

Coordinated architectural, structural, electrical, mechanical and plumbing design, prepared by qualified professionals.

Project Management & Supervision

Planning, technical coordination, cost control, progress monitoring, quality control and site supervision.

Renovation, Fit-Out & Specialised Works

Refurbishment, interior fit-out, façade works, aluminium and glazing, and specialised construction requirements.

CONCEPT TO COMPLETION

One coordinated journey, from understanding your requirements to an organised handover.

1

Concept

Understand your needs and budget.

2

Design

Coordinate buildable solutions.

3

Costing

Align the design with the budget.

4

Build

Manage site execution.

5

Supervise

Control quality and progress.

6

Handover

Inspect, rectify and document.

Better engineering solutions. Transparent communication. Support from concept to completion.

WHY BETA PRIME

We measure our success by the added value every client gains from working with us.

Engineering-Driven Solutions

Technical thinking that solves problems early and supports better project decisions.

Transparent Communication

Clear information and practical explanations at every stage of the project.

End-to-End Support

One team involved from the first concept discussion to the final handover.

Professional Management

Structured planning, coordination, monitoring and accountability.

Quality-Focused Execution

Skilled workmanship, proper detailing, compliance and continuous supervision.

International & Local Experience

International construction exposure combined with in-depth knowledge of the Ghanaian market.

OUR EXPERIENCE

Our founding team brings more than 20 years of combined experience across Ghana and international markets.

Industry Experience

Civil engineering, construction management, project management, site execution and project delivery.

Our core engineering and senior site supervision team works with skilled trades and specialist subcontractors, mobilised to match the needs of each project.

Professional & Technical Expertise

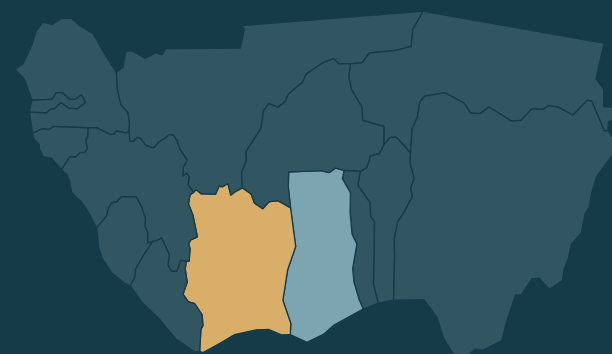

Engineering & business

Master's in Civil Engineering; MBA in Global Business Administration; MBA in Business Administration.

Project & digital engineering

PMP®; Autodesk Revit Structure Certification; EDGE v3 Technical / EDGE Expert Training.

Regional Direction

- Ghana: current market
- Côte d'Ivoire: planned expansion

Health & safety training

Occupational Health & Safety; IOSH Managing Safely in Construction; OSHA 30-Hour Construction Safety & Health; HSE Officer training.

Our team's experience spans Ghana, the Middle East and South Asia.

OUR LEADERSHIP TEAM

The engineers and managers who lead every Beta Prime project.

AMADO MAROUN BOUSTANI

FOUNDING PARTNER & GENERAL DIRECTOR

A civil engineer and construction professional with more than 20 years of experience in project management, tendering, cost control, planning and site execution across Ghana and the Middle East. Amado has worked on residential, warehouse, commercial and infrastructure projects, with strong exposure to EPC and FIDIC-based contracts.

Qualifications: MBA – Lebanese American University (LAU) | BS & MS in Civil Engineering – University of Balamand | EDGE Expert | Autodesk Revit Structure Certified.

SAMY PERUMAL

FOUNDING PARTNER | OPERATIONS DIRECTOR

Samy leads day-to-day operations, bringing strong hands-on experience in site execution, workforce supervision, subcontractor coordination, procurement and logistics. He is responsible for productivity, quality, safety and the timely delivery of every project.

Qualifications: Professional Diploma in Occupational Health & Safety – NASP (USA) | IOSH Managing Safely in Construction | OSHA 30-Hour Construction Safety & Health | Diploma in Health, Safety & Environmental Management – Indian Institute of Safety Management.

ELIZABETH OHENE

PROJECTS & CLIENT RELATIONS MANAGER

Elizabeth is the link between clients, consultants and project teams. She manages client relations, project follow-up, documentation, proposals and stakeholder coordination to keep every project running smoothly.

Qualifications: Project Management Professional (PMP)®

QUALITY & HSE

Structured supervision, disciplined execution, safe working practices and consistent quality control guide every project.

- Approved drawings and specifications
- Engineering and site supervision
- Inspections and controlled workmanship
- Safe working practices
- Site organisation and housekeeping
- Documentation and reporting
- Design, procurement and construction coordination
- Continuous improvement

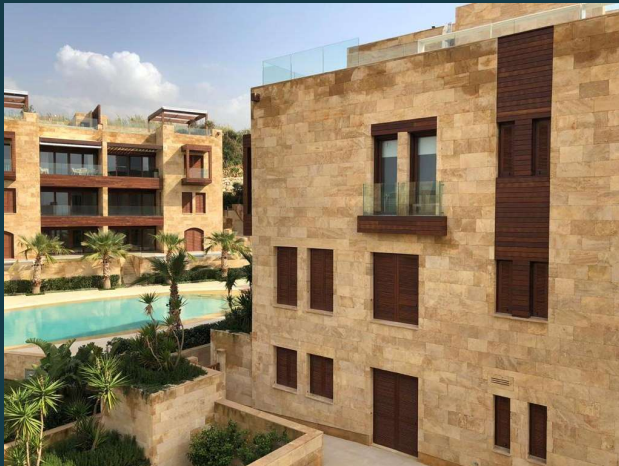

WORKING TOWARD ISO 9001 CERTIFICATION

Beta Prime is working toward ISO 9001 certification with Bureau Veritas Ghana.

We are building a Quality Management System aligned with ISO 9001 requirements, embedding quality into how we plan, execute, monitor and deliver every project.

FOUNDING TEAM PROJECT PORTFOLIO

Selected work delivered by members of our founding team before Beta Prime was established.

Residential development

High-quality residential developments that combine contemporary design, landscaped surroundings and integrated lifestyle amenities.

Design Projects

A beach club designed around existing mature trees, integrating pools, restaurants and leisure spaces.

Façade & Glazing Works

Clean architectural lines and precise detailing, with carefully integrated glass and aluminium systems that enhance appearance, natural light and functionality.

Renovation & Fit-Out Works

Existing spaces transformed through considered renovation and interior fit-out, with coordinated finishes and detailing that improve comfort, functionality and appearance.

LET'S BUILD SOMETHING BETTER.

Built on Quality. Driven by Engineering.

Planning a project? Talk to us about your requirements, budget and timeline.
